

Lift - to provide audio-visual alarms and indications through UPS when there is a power failure

Due to powercut, lift movement in multistory buildings is stopped. To attract the attention of nearby people, emergency button in lift sidewalls and audio-visual indications in the lift outside shall be provided in lifts using UPS.

Note :

- (i) UPS for supply to danger light, emergency alarms, emergency button inside the lift, etc.
- (ii) Emergency button to press if there is power cut to attract the human beings present in the vicinity.

Figure : Lift - Safety features, If there is power failure.
